JUROR AND WITNESS.

Justice Brewer Thinks They Have Some Rights Which Trial Lawyers Should Respect.

Justice David G. Brewer, of the United States supreme court, arraigned the jury and witness systems of the United States in a recent lecture on "Responsibility of Citizenship" before Yale students. He said:

"It is one of the duties of Ameri can citizenship that we are called to serve as jurymen. How many cases of sickness the jury call reveals! Men do not like to serve as jurors, and I don't blame them. The jury system as it is at present administered is little more than a relic of a semibarbaric age.

"The juror is treated little better

night and is given little more pay than a day laborer. He is compelled to listen to the wrangle of lawyers. I hope that the time will come when the juror will be treated like a gentleman and when he will receive the pay of a business man. I also hope that the jury system of conviction will give way in which the concurrence of a reasonable number of jurors shall determine the verdict.

"It is one of the duties of American citizenship to perform the duties of a witness when summoned into court, although under the present system the witness is treated like a liar and is browbeaten by opposing lawyers. But the juror and the witness should strive for their own elevation, and should perform their duties of citizenship in these respects when called on to do so.

"It has been said that prohibitory laws are the most certain incentives of perjury known. Both witnesses and jurors are parleying with conscience, and their attitudes spring from objection to the law. I do not mean to say that some of them may be unwise. I people may be made good by statutes or ordinances, but I do wish to say that when a city passes an ordinance it is the duty of its residents to uphold it."
